

MIT ACADEMY OF ENGINEERING
FINAL YEAR BTECH SEMESTER - VII EXAMINATION 2025 – 2026
DEPARTMENT OF COMPUTER ENGINEERING
GENERATIVE ARTIFICIAL INTELLIGENCE (PEC Students)
IA Activity 1 on Poster Presentation

Date: 11th November 2025

Marks: 20

1. Activity Context

Students will present a project poster based on a single project title that incorporates four Generative AI techniques (e.g., GAN, VAE, Diffusion Models, and Transformer). This activity aims to assess students' technical depth, understanding of multiple models, comparative analysis, visual communication, and ethical considerations.

2. Poster Content Structure

Section Title	What to Include
Project Title & Objective	Clear title + problem being solved
Dataset Description	Source, size, preprocessing
Model 1: Autoencoder/ VAE	Architecture, sample outputs
Model 2: GAN	Architecture, sample outputs
Model 3: Transformer	Architecture, sample outputs
Model 4: Diffusion	Architecture, sample outputs
Performance Metrics	Compare all 4 using FID, SSIM, BLEU, etc.
Challenges & Learnings	What worked, what didn't
Ethical Considerations	Bias, misuse, limitations
Conclusion	Key insights, future work

3. Evaluation Rubrics (Total: 20 Marks)

Criteria	Marks	Relevant COs	Mapped POs	RBT Level	Excellent	Good	Satisfactory	Poor
Technical Accuracy	6	CO1 CO2 CO3	PO1, PO2, PO3, PO5	L3, L4	Content is technically sound, accurate use of GenAI models (Autoencoder, VAE, GAN, Diffusion), correct results/interpretation (6 marks)	Minor inaccuracies, but overall sound understanding (5 marks)	Basic understanding with gaps, limited technical accuracy (3 marks)	Incorrect, Superficial or copied content (1 mark)
Visual Presentation	4	CO2	PO5, PO10	L3	Slides/reports are professional, clear diagrams, well-structured, visually engaging(4)	Mostly clear, minor issues in structure or visuals(3)	Basic visuals, some clutter, lack of polish (2)	Poorly designed visuals, unreadable or unstructured(1)
Comparative Analysis	4	CO1, CO3	PO2, PO4, PO11	L4, L5	Strong model comparison (metrics, graphs, insights, justification of best model)(4)	Comparison done with limited depth(3)	Minimal comparison, lacks justification(2)	No comparative analysis provided(1)
Communication & Delivery	3	CO2, CO4	PO9, PO10, PO12	L3 , L5	Clear, confident, professional delivery; logical flow; audience engaged(3)	Generally clear, some gaps in clarity or confidence(2)	Delivery is basic, lacks flow, not engaging (1)	Unclear or unprofessional delivery(0)
Q&A Handling	3	CO3 CO4	PO2, PO8, PO9, PO12	L4 , L5	Questions answered with clarity, technical depth, and ethical awareness(3)	Most questions answered reasonably well(2)	Limited answers with partial accuracy (1)	Unable to answer questions effectively (0)

4. Activity Timeline

- Day 1: Poster Guidelines Shared
- Day 2: Poster Presentation Day (15 min/team)

5. Logistics & Optional Awards

Venue: Large classroom/lab or open hallway

Mode: Printed or digital posters

Judges: 1-2 faculty evaluators

- Optional Awards:
- Best Poster
- Most Technically Sound
- Best Use of Ethics
- Best Q&A Handling

Subject Teacher

Mrs. Savita Mane
